

SMARTTraining NOW

Singapore Math In-Depth Summit 2019

We at SMARTTraining are very excited about our program this year. The focus will be on mathematical connections. Brad Fulton is kicking off with a discussion on an integrated approach to math instruction. He will demonstrate how this approach leads to greater success and increased student engagement. Our sessions will offer time for you to explore, deepen your own understanding, and network with other professionals. As you leave the conference, you will take with you activities and content knowledge to start off your year with confidence.

Dr. Yeap Ban Har will be addressing the focal points of our three grade bands (K-2, 3-5 and 6-8) in depth. Each of these sessions is scheduled for three hours. Bring your questions!

We look forward to three mathematical, fun-filled days.

This is our fifth year and we have taken the suggestions from prior attendees to heart. We look forward to seeing you all in beautiful balmy Phoenix in July!

Tricia and Linda
